MEXICAN FRUITFLY REGULATIONS MODIFIED

Introductory Note

The following administrative instructions lift all permit requirements relative to interstate movement of regulated citrus fruits from the area regulated on account of the Mexican fruitfly until notice is given that the status of fruitfly infestations in the regulated areas as determined by inspections and surveys make it necessary for such permit requirements to be imposed. This action which lessens the requirements of the regulations will not lessen the protection to uninfested areas. This modification is believed safe because intensive inspections over a number of years have shown that infestations do not occur during the early part of the harvesting and shipping season.

§ 301.64-3 Administrative instructions lifting permit requirements for interstate movement of citrus fruits until further notice.--Pursuant to the authority conferred upon the Chief of the Bureau of Entomology and Plant Quarantine in the proviso of § 301.64-3 (a) of Notice of Quarantine No. 64 on account of the Mexican fruitfly, he has determined that natural conditions exist with respect to the regulated area which eliminate the risk of Mexican fruitfly infestations in regulated citrus fruits during the early part of the shipping season; accordingly all permit requirements for interstate movement of such fruits are hereby waived for the entire regulated area until due notice of the resumption of permit requirements has been given.

(Section 8, 37 Stat. 318, 39 Stat. 1165, 44 Stat. 250; 7 U.S.C. 1940 ed. 161; 7 CFR § 301.64-3 (a).)

Done at Washington, D. C., this 23rd day of November 1945.

P. N. ANNAND,
Chief, Bureau of Entomology
and Plant Quarantine
